

Spring Vegetable Gardening Series (10 Weekly Workshops)

**Learn how to grow from seed to harvest,
and take home what you grow!**

Duval County Extension Urban Gardening Program

Have you always wanted to grow your own vegetables but don't know where to start? Or have you had problems along the way that you didn't know how to solve? Our new Spring Vegetable Gardening Series might be for you!

During this hands-on 10-week class we will start crops from seed as well as transplants, and take care of them as they grow—together! We will grow a variety of spring vegetables, herbs and pollinator crops in the ground and in containers. Participants who complete the series will take home what they grow. Class will meet weekly on Thursday evenings. Each week we will begin with a short classroom session, and then implement that lesson in the garden. Topics covered will include:

- Planning and Preparing Your Garden Site
- Planting seeds and transplants
- General Botany
- Watering, Fertilizing and Weeding
- Integrated Pest Management
- Disease ID and Management
- Crop Rotation
- Harvesting, Storing and Eating
- Planning and Preparing for the Next Crop
