

Dear UF/IFAS GI-BMP Community,

Due to the effects of COVID-19 all Extension GI-BMP face-to-face classes have been suspended through June 1, 2020.

However online and DVD classes remain available.

You can learn more about these at the links below.

Online Training - <https://gibmp.ifas.ufl.edu/study/featureCourses-frame.faces>

DVD Training - <https://gibmp.ifas.ufl.edu/dvd/info.faces>

We realize that some of you will require CEUs to keep your Limited Commercial Fertilizer Applicator Certificate current. Since the Extension face-to-face classes are not currently available, you can use the resources below.

The UF/IFAS Florida-Friendly Landscaping™ Program offers two one-hour online courses. These normally would cost \$25.00 each, but through June 1, 2020, these are discounted to \$15.00 each.

https://ffl.ifas.ufl.edu/ceus/ceus_lcfac.htm

Core CEUs are available from the UF/IFAS Extension Pesticide Information Office (PIO). Courses and information are listed on the CEUs menu (far right on the white bar):

<https://pested.ifas.ufl.edu/>

You can also search the FDACS public database to find all approved CEU classes, including online classes:

<http://aessearch.freshfromflorida.com/AvailableClassSearch.asp>

Tips for searching the FDACS database:

For online courses select 'on-line' at the bottom of the 'Locations' list.

For Categories select 482 General Standards/Core and/or Limited Urban

Fertilizer.

Click on the courses that interest you to get the provider's information.

Please know that the UF/IFAS Extension GI-BMP Program will continue to offer help should you have any questions. We look forward to a time when our in-person Extension classes are once again available for you and our industry partners to attend. Please share this information with your clients who have questions. In the meantime, stay safe and take care.

Sincerely,

Esen Momol
Director

and

Tom Wichman
Statewide GI-BMP Program Coordinator
