

Income - _____ Project Year _____

(If recording more than one project, you will need separate records for each project, i.e., heifer, steer, etc.)

List any income received from your project this year. For instance, this could include sales of any project-related items or cash prizes from contests or exhibitions. Income may also include live animals sold. It is quite likely your project had no income. If so, enter "None" under description and "0" under "Total Income."

Date	Description of Income (Include Quantities)	Income
	<i>Example: Sold 1 Beef Steer</i>	<i>\$1500.00</i>
Total		

Total Project Cost - _____ Project Year _____

(If recording more than one project, you will need separate records for each project, i.e., heifer, steer, etc.)

If your project earned more than it cost, then your project made a profit. In other words, if your income minus your expenses is a positive (+) number, then your project "made" money.

If income minus expenses is a negative (-) number, you spent more on your project than you earned from it. This amount is the total cost of your project. But don't worry if your project did not make a profit! Although a business aims to earn a profit, a 4-H project is intended to be a learning experience rather than a money making project. The important point to learn is that most activities have expenses. Therefore, you must be careful to spend money wisely.
