**Dear Parents and Guardians,**

Your child's class is participating in the UF/IFAS Extension 4-H School Enrichment Embryology Program, also supported by your local County Extension Service. 4-H Embryology teaches students about science and respect for life. Students will hatch chicks in the classroom and witness the exciting miracle of life. Students will also take the responsibilities of caring for the fertilized eggs and then the chicks after they have hatched.

I hope that this is an exciting experience that everyone can enjoy! If you have any questions or concerns please contact our office any time.

Sincerely,

4-H Youth Development Agent

4-H is open to all youth, ages 5-18, determined as of September 1 of the current 4-H program year and open to all counties in the State of Florida.
