

Peanut Varieties

Normal Oleic

FloRun™ ‘52N’

- **Medium Runner seed size:** about 700 seeds per pound
 - **Medium Maturity:** 140 days in FL under irrigation
 - **Yield Potential:** 3-ton potential in FL, GA
 - **Grade Potential:** upper 70's- 76-78% TSMK
 - **Diseases:**
 - White mold- moderately susceptible
 - Leaf spot- moderately susceptible
 - TSWV- moderately susceptible
 - **Growth Habit:** spreading runner, shorter
-

‘Arnie’

- **Medium runner seed size:** about 700 seeds per pound
 - **Medium Maturity:** about 140 days under irrigation
 - **Yield Potential:** 3-ton plus in FL
 - **Grade Potential:** upper 70's- 76-78% TSMK
 - **Diseases:**
 - White Mold: Moderately susceptible
 - Leaf Spot: Moderately susceptible
 - TSWV- Very strong resistance, ‘Arnie’ is among the most resistant of all commercial peanut varieties to TSWV
 - **Growth Habit:** Semi-erect, prominent center stem, moderate size
 - **About 15-20% of Arnie pods have 3 seeds**
-

Peanut Varieties

High Oleic

FloRun™ ‘725’

- **Medium-small Runner seed size:** 750-800 seeds per pound
 - **Medium Maturity:** 140 days in FL under irrigation
 - **Yield Potential:** 3-ton potential in FL, GA
 - **Grade Potential:** upper 70's- 76-78% TSMK
 - **Diseases:** White mold- moderately resistant
Leaf spot- moderately resistant
TSWV- highly resistant; among the most resistant of all commercial peanut varieties to TSWV
 - **Growth Habit:** Spreading runner, smaller bush, light green color
-

FloRun™ ‘618’

- **Large Runner seed size:** 600-650 seeds per pound
 - **Medium-Early Maturity:** 135 days in FL under irrigation
 - **Yield Potential:** 3-ton potential in FL, MS
 - **Grade Potential:** upper 70's- 76-78% TSMK
 - **Diseases:** White mold- moderately susceptible
Leaf spot- moderately susceptible
TSWV- moderately resistant
 - **Growth Habit:** Spreading runner, moderate-large bush size, growth regulator may be helpful
-

FloRun™ ‘T61’

- **Medium Runner seed size:** 650-700 seeds per pound
 - **Medium Maturity:** 145 days in FL under irrigation
 - **Yield Potential:** 3-ton potential in FL, GA
 - **Grade Potential:** mid 70's- 74-76% TSMK
 - **Diseases:** White mold- moderately resistant
Leaf spot- susceptible
TSWV- moderately resistant
 - **Growth Habit:** Spreading runner, moderate-large bush size, growth regulator may be helpful
-

Peanut Varieties

Gorbet

- **Small Runner seed size:** 800-850 seeds per pound
- **Medium Maturity:** 140 days in FL under irrigation
- **Yield Potential:** 3-ton potential in FL, GA
- **Grade Potential:** upper 70's- 76-78% TSMK
- **Diseases:** White mold- susceptible
Leaf spot- moderately resistant
TSWV- Very strong resistance
- **Growth Habit:** Spreading runner, tall, large plant, growth regulator may be helpful
