Agriculture is another word for farming. It is the science, art, and practice of cultivating the soil and crop plants and raising livestock. The role of agriculture is to provide the food, raw materials and other products humans need to survive. Basically, farmers help feed the world, cloth the world, shelter the world, and their plants help clean the air. In Florida, agriculture is our #2 industry, second to tourism!

On today's Farm Tour, we will be visiting 5 of our Seminole County farms and learning a lot about Seminole County agriculture past, present and future. Throughout the day, we will hear directly from our local farmers about the hard work it takes to produce our food. We have a long, fun filled day ahead of us! Please be mindful that these are working farms. We will be outside walking on a variety of terrains and of course, please watch your step. Be sure to put on sunblock and stay hydrated throughout the day! Also, please be respectful of others on the tour. We also want to be respectful of the time our busy farmers are taking to show us their farms. That being said you may have the opportunity to purchase products from the local farms throughout the day, but keep in mind that we have limited time at each farm. You may have to visit the farms at another time to make purchases so that we can keep the bus moving.

Wondering what's for lunch? Lunch will be a delicious spread of BBQ, sides and sweets at one of our farm stops. If you have any dietary requests that were indicated on the event registration, we have food to accommodate those.
